MF Bar

Strong, Angled Container Seal

ISO 17712 “H” Compliant · C-TPAT Compliant

Made of high-strength steel, the MF Bar’s locking mechanism is embedded in the groove of the metal bush, making the seal stronger and more difficult to tamper with.

Typical applications of the MF Bar Seal include securing shipping and intermodal containers. It is also widely used for ground transportation.

Features

- 1** The MF Bar is a strong bolt seal used to lock containers’ central bars in securing the transportation of high-value goods.

This effectively works to deter tampering and illegal access into sealed containers and trucks.
- 2** There are a number of adjustable locking positions to allow for greater flexibility and precision when securing containers.
- 3** Identical sequential numbers on the bar and bolt seal provide greater security as this prevents parts substitution or replacement.
- 4** The locking bolt seal is made of high-strength steel for added security.

Technical Specifications

PRODUCT

Product Code	Material	Dimensions	Bolt Diameter	Tensile Strength	Marking Area	Max Marking Digits
MF Bar	High-strength Steel	Bar: 555.0 x 35.0 mm Locking Bolt: 3.5cm	Ø 11.0 mm	2100 kg	Pin: 23.5mm	8 digits

PACKAGING

	Quantity	Dimensions (mm)	Gross Weight kg	Volume m ³	Standard Colours
Inner Carton	25 sets	560 x 210 x 190 (22.05 x 8.27 x 7.48 in)	16 (35.27 lbs)	0.02234 (0.789 cu.ft.)	<div style="display: flex; gap: 5px;"> <div style="border: 1px solid black; width: 20px; height: 10px; background-color: white;"></div> <div style="border: 1px solid black; width: 20px; height: 10px; background-color: red;"></div> <div style="border: 1px solid black; width: 20px; height: 10px; background-color: yellow;"></div> <div style="border: 1px solid black; width: 20px; height: 10px; background-color: green;"></div> <div style="border: 1px solid black; width: 20px; height: 10px; background-color: blue;"></div> </div>
